

## LIST OF BOARD-APPROVED SHRUBS FOR HOMEOWNER PLANTING

This list is intended to help homeowners who wish to plant in the common area immediately surrounding their units, by identifying shrubs that are hardy to this area. It does not include perennials, vines, bulbs or ground cover plants. It does not include trees, as homeowners should not plant trees along the walls of their units. The list is not exclusive. Homeowners may make a request to the Board if they wish to plant a shrub that is not included on this list. Please check labels or research to choose plants that will fit into the area when they reach full size.

Buxus (boxwood) – evergreen/sun or shade/regular water

Buddleja (butterfly bush) – deciduous/full sun or light shade/moderate to regular water
